Tecnau Cutter  
**TC 1050MF**

# TC 1050NF Specifications

The **GBR Tecna TC 1050NF** is the latest in cutter technology, multi-programmable (99 jobs) and highly versatile, it can run off-line or on-line with a printer. It is easy to set-up. You simply feed the beginning of the web into the tractor feed, and select the trim configuration then press the button and start running. Unlike other cutters on the market, the blades are stored in a special cassette. When the blades wear, the operator simply undoes two screws, removes the cassette and drops in a new one. In less than two minutes, the cutter is up and running again.
