

# Folding On-Line Made Easy

## Outperform the competition with the speed, reliability and accuracy of the CAS folders!

"We have produced over 53 million folded pieces in less than 2 ½ years. The production and reliability of our MB CAS folder has been outstanding."  
*Anderson Direct, CA*  
(Direct Marketers)

"We have at least doubled maybe tripled our production with the SetMATIC folder."  
*The Rylander Company, IL*  
(Direct Marketers)

"Set-up time becomes production time. We have had a 30-40% increase in productivity in certain jobs."  
*Mailmen Inc., NY*  
(Direct Marketers)

"We have produced enough savings with the folder that we can pay it off in eight months."  
*Hershey Foods, PA*  
(In-plant operations)

"We cut our temporary help in bindery alone by about 35 percent".  
*Creative Automation, IL*  
(Bindery/Lettershop)

### Fast. Simple to Operate. Versatile.

**Folding On-Line Made Easy!** The Mathias Bäuerle CAS folders offer fast turnaround times, precise folds and unsurpassed ease of operation. With speeds of up to 40,000 documents per hour, there are a wide variety of folder configurations to suit your application needs and distinguish your business offerings. The CAS 52-A folder models operate on-line with cutters, roll-unwinds and **Digital Printers**. Modular systems for gluing, gate folding, pressure sealing and miniature folding are also available.

**Multimaster CAS 52-A TI 90**

The CAS 52-A TI 90 computer-controlled folding system operates on-line with high volume cut sheet laser printers that have bypass transports. The TI 90 portion of the system processes sheet sizes from 11" x 8 ½" (and A4) to 18 ¼" x 12 ½", either directly into the folder or turned 90 degrees. This system, when coupled with a pressure sealer, provides secure "unseen by human eyes" processing of highly sensitive documents. In other applications, it provides the quickest and most efficient completion of folded documents in a one-pass process.

### Pressure Sealer (runs on-line with digital folders)

GBR's **PS800 pressure seal system** offers a simple, effective way to process salary and pay advice notices, checks and remittance forms, tax notification and pension forms. The world's fastest pressure sealer, the PS800, can process up to 40,000 single width 11" long documents per hour. Utilizing the Mathias Bäuerle state-of-the-art precision folding technology, combined with automatic processing controls, the PS800 is ideal for large capacity users.

**Tecna Perfoflex TC 1500/1550**

The Tecna Perfoflex TC 1500/1550 (links with digital printers, unwinders, rewinders, cutters and other devices). The main features of the Perfoflex include: connection on-line with laser printers, one or two independent length perforations, two independent cross perforations for 1-up or 2-up applications, length and cross perforation positions programmable by operating keyboard, cross perforation length determined by blade size, easily interchangeable, serial and parallel interface and height adjustment paper level device.
