

PRESSURE SEAL SYSTEMS

V-fold

Z-fold

C-fold

Whether you're processing pay slips, pension forms, direct mail, remittance advice slips or any other confidential form, PSS will save you time and money. By folding and sealing your forms at high speeds, the PSS folder/sealers will leave you with time to concentrate on other tasks.

At the same time, in addition to being tamper-evident, this single piece mailer will save you the cost of envelopes and form insertions.

Fitting easily into any office environment, the system will work with your existing printer and is extremely easy to use. With the Pressure Seal process there is no liquid glue, heat or water, therefore, no mess or risk of burns.

Paper flow is electronically monitored and the system will automatically shut down in the event of interruption. You can immediately begin operating without disputing document sequence or count. In addition, an outfeed counter is a standard feature, to allow easy calculation of processed documents.

PS100

The PS100, synonymous with quality and efficiency is repeatedly our customers' preferred choice for small to medium processing of one-piece mailers.

Technical Specification
